Ice Cream: What's Inside?

Directions: What goes into ice cream? Look at a real ice cream carton and then look at the ingredients listed below. Choose the matching ingredients. Cut them out and glue them onto the label of the ice cream carton. If some ingredients are not given, add them in the empty boxes. Do not forget to name your ice cream.

Measuring Ice Cream Quarts

Directions: Did you know that each person eats an average of 15 quarts of ice cream each year? That is a lot of ice cream! In order to better understand the size of a quart, cut out the measuring patterns. Trace them to make as many copies as directed. Use the patterns to answer the questions.
