## Ideas for Using Multimedia Collections in the Classroom

---

### Teacher Uses *(cont.)*

- Create interactive practice activities using multimedia software such as *HyperStudio*.

- Import a series of images into slide-show software such as *Microsoft PowerPoint*. Set the slide show to repeat itself on a computer at the front of the classroom or on a connected TV monitor. Use this simple slide show to grab students' attention as they walk into the classroom.
- Create a multimedia presentation using images and sound or video to illustrate your lesson.
- Make a Web page activity using the images and adding any hypertext links to sites you want your students to visit. Save the Web page to a folder on your hard drive so students can view it quickly. Include sounds or video clips to add more interest.
